

A TRADITION OF EXCELLENCE

MALONE LAW

More than 50 years ago, Adam Malone's father, legendary lawyer Tommy Malone, began fighting insurance companies, hospitals and powerful corporations on behalf of people whose lives had been upended by catastrophic injury or wrongful death.

Malone Law is now one of the most respected injury law firms in Georgia, and Adam Malone himself has recovered more than \$500 million for his clients, with many verdicts and settlements surpassing \$20 million.

"When people come to us, their lives have often been destroyed, or a loved one has been unnecessarily injured or killed by someone else's careless, risky or dangerous choices," says Malone. "In those situations, people need a lawyer who knows their way around a courtroom, tries cases, and gets results that change lives and change irresponsible behavior."

"My father started this firm to help people who had no voice, and I am proud to continue building on his legacy."

FIGHTING FOR JUSTICE

Malone Law’s courtroom success is no accident.

In the courtroom, Adam Malone and his team are known for their thorough preparation, attention to detail, and ability to keep things simple even when the defense is trying to confuse and complicate the case.

To ensure only meritorious cases are brought by Malone and his team, Malone Law has developed an innovative approach to medical malpractice litigation that combines their unrivaled experience with a team of independent medical advisors in every specialty of medicine. With this combination of resources, Malone Law can quickly determine the merits of a potential case, stay focused, and move swiftly through the litigation process to trial or settlement.

A SAFER WORLD

Malone Law was started with the idea that victims of medical or corporate negligence deserve a fighting chance at justice in a system which often ignores them and favors the powerful.

“Every time we win a case, expose system failures and hold wrongdoers accountable, I believe we not only improve the lives of our clients, but we also help make our roads and hospitals safer for everyone,” says Adam Malone.

Often, the verdicts and settlements obtained by Malone Law result in systemic and regulatory changes that help prevent other people from being hurt in the same way. Sadly, holding powerful hospitals, insurance companies and corporations accountable in a court of law is sometimes the only way to make these life-saving changes happen.
